Team & Module Overview

#	Member	Module	Framework	Tests / Pass
1	Telukuntla Sindhu	Hotel Booking	Selenium PyTest + BDD	7 / 7
2	Hariharan M	Trip Planner	Selenium PyTest + BDD	7 / 7
3	Punya Pratiksha Sahoo	Flight Booking	Selenium PyTest + BDD	7 / 7
4	Himanshu Gupta	Train Booking	Selenium PyTest + BDD	7 / 7
5	Trisha Nandi	Vande Bharat Train Booking	Selenium PyTest + BDD	7 / 7
6	Pramithi Pal	Bus Booking	Selenium PyTest + BDD	7 / 7

MODULE OVERVIEW

Automates the end-to-end hotel booking workflow: login, destination search, hotel search, filter application, room reservation, guest detail entry, and payment validation.

✓ Positive Tests Executed

- **Hotel Search:** Validated dynamic destination search using auto-suggestions.
- **Filter Validation:** Verified successful application of the "Free Breakfast" filter.
- **Guest Details:** Automated dynamic data entry from external CSV to the reservation form.
- **Payment Flow:** Verified processing of correct Credit/Debit card details.

✗ Negative Tests Executed

- **Invalid Payment:** Verified system error handling for insufficient card digits.
- **Empty Details:** Ensured validation triggers when mandatory guest fields are left blank.

MODULE OVERVIEW

Automates the ixigo Trip Planner module: travel month selection, origin city entry, filter selection, tourist location navigation, Google Maps verification, and flight booking workflow.

✓ Positive Tests Executed

- **Plan Navigation:** Validated successful loading and routing of planner module URLs.
- **Month Selection:** Automated dynamic travel month input driven by Excel data.
- **Filter Application:** Validated results for "International" & "Pollution Free" tags.
- **Location Card:** Verified successful navigation to specific tourist destination pages.

✗ Negative Tests Executed

- **Invalid Location:** Verified the "no results found" error message displays correctly.
- **Book Now Button:** Ensured the booking button remains hidden for unsupported routes.

MODULE OVERVIEW

Automates the ixigo flight booking path: search validation, result filtering/sorting, booking flow, traveller details, add-ons, seat selection, and payment page.

✓ Positive Tests Executed

- **Search & Filter:** Validated flight result loading, non-stop filtering, and price sorting.
- **Booking Navigation:** Handled cancellation prompts and validated URL states.
- **Traveller Entry:** Automated form filling using external CSV data sets.
- **Add-ons & Payment:** Verified the seat selection process and payment page routing.

✗ Negative Tests Executed

- **Same Route:** Ensured search is blocked when source and destination are identical.
- **Missing Input:** Ensured search is blocked when the destination field is omitted.

MODULE OVERVIEW

Automates the ixigo train booking journey: OTP-based login, dynamic train search with source/destination/date from Excel, available seat selection, passenger details, and payment page validation.

✓ Positive Tests Executed

- **Valid Login:** Automated handling of OTP-based login verification.
- **Train Search:** Validated dynamic station and travel date search inputs.
- **Seat Booking:** Automated the selection of available train seats.
- **Passenger Flow & Payment Flow:** Verified the end-to-end journey to the payment confirmation page.

✗ Negative Tests Executed

- **Invalid Station:** Ensured the booking process stops with invalid station data.
- **Empty Passenger:** Verified the system blocks saving passenger details without a name.

MODULE OVERVIEW

Automates the ixigo train booking journey: OTP-based login, direct navigation to filter Vande Bharat Express routes, future calendar date and seat inventory selection, dynamic passenger details injection from Excel, and secure payment page layout validation.

✓ Positive Tests Executed

- **Login Button:** Login button visible successfully.
- **Valid Mobile Number Entry:** Mobile number accepted successfully.
- **Continue Button:** Continue button works properly.
- **Complete Login Flow:** Login completed successfully.

✗ Negative Tests Executed

- **Invalid Mobile Number:** Message displayed for invalid mobile number.
- **Empty Mobile Number:** Ensured validation triggers when the mobile number field is left empty.

MODULE OVERVIEW

Automates the ixigo Buses module: login, bus navigation, source/destination entry, travel date selection, bus search, filter application, seat selection, passenger details, and payment page verification.

✓ Positive Tests Executed

- **Bus Search:** Validated source, destination, and travel date entry functionality.
- **Filter Selection:** Verified application of AC, Sleeper, and Departure Time filters.
- **Seat Selection:** Automated navigation of the seat layout and selection of available seats.
- **Payment Navigation:** Validated passenger detail entry and proper routing to checkout.

✗ Negative Tests Executed

- **Invalid City:** Verified application error handling for unsupported or fake locations.
- **No Availability:** Verified that unavailable/grayed-out seats cannot be selected or booked.

DELIVERABLES

What we built and tested

AUTOMATION FRAMEWORK

Selenium WebDriver + PyTest + Behave BDD with Page Object Model (POM) architecture

TEST COVERAGE

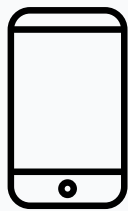

End-to-End, Positive & Negative test cases across all team modules (100% pass rate)

ALLURE REPORTS

Professional HTML reports with step-by-step execution flow, screenshots & history

SCREENSHOT EVIDENCE

Automated screenshot capture at each key execution stage for audit & debugging

EXECUTION LOGS

Detailed Python logging for execution tracking and failure diagnosis, the log reports were made.

GITHUB REPOSITORY

Full codebase with README, feature files, page objects, and data files version-controlled
